DESCRIPTION

Available in standard white or black finish, the powerful and versatile C SERIES CP6 provides high quality paging and musical performance. It is designed for open architecture spaces or any location where a stylish pendant form factor is desired. Uniform voicing throughout the C SERIES means that the CP6 can be combined with other members of the Commercial Design product family without compromising consistency from zone to zone. Community's proprietary Tru-Phase™ waveguide produces a consistently wide conical polar response up to 16 kHz. The genuine coaxial design uses separate magnets for the LF and HF drivers for reduced distortion and industry leading sensitivity, thereby permitting up to 3 dB greater output level while requiring up to half the amplification power of competing products. An easy-access selector switch is conveniently located on the face of the loudspeaker for selectable 8 ohm or 70V/100V operation, while an integrated rear cover hides all wiring and hanging hardware for an aesthetically pleasing installation.

NOTES:

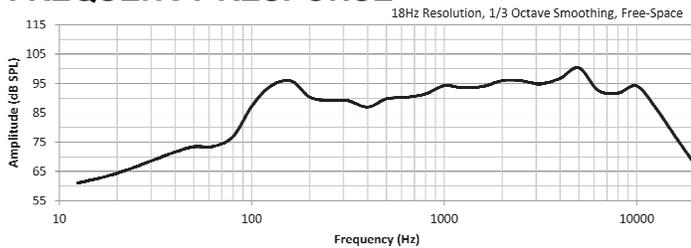

1. Sensitivity: Full space measurement at 3.28ft (1m), calculated using input of 2.83 volts RMS
2. Watts: All wattage figures are calculated using the rated nominal impedance.

ARCHITECTURAL SPECIFICATIONS

The loudspeaker system shall be a two-way, full-range ceiling mount system with a 6.5-inch low frequency transducer with a coaxially mounted 0.75-inch exit high frequency compression driver. The drivers shall be connected to an integral crossover with a crossover frequency of 2 kHz, with a self-resetting solid state circuit breaker for driver protection. The system shall have an amplitude response of 70 Hz to 13.5 kHz (-10 dB) and a low impedance (8 ohm) input capability of 22V RMS. The sensitivity at 1W/1m shall be 91 dB SPL (100 Hz to 12.5 kHz 1/3 octave bands). The loudspeaker system shall have a conical coverage pattern of 120° conical from 500 Hz to 6 kHz. The nominal system impedance shall be 8 ohms (in low impedance setting). The loudspeaker enclosure and loudspeaker baffle shall be paintable and constructed of UL 94V-0 rated ABS plastic. A paintable steel grille with a durable powder coat finish shall be included. The system shall be equipped with a 30W high performance autoformer for use in 70.7V or 100V distributed audio systems with 30W, 15W, 7.5W, and 3.75W taps available in 70.7V distributed systems (30W, 15W and 7.5W taps available in 100V distributed systems). An easily accessible front-face tap selector switch located on the front baffle, which is concealed by the supplied removable grille, shall be available for selecting autoformer and low impedance settings. Two 15ft (4.5m) long 2mm (0.079") high tensile galvanized steel wire rope suspension cables shall be included, one for main suspension and one as a safety cable, along with Grippler® brand adjustable height cable fasteners. Integrated spring clips shall attach the cable to the loudspeaker bracket. An integrated rear cover shall be included to hide wiring and hanging hardware. The loudspeaker system shall have a diameter of 10.0" (254 mm) and an enclosure height of 13.629" (346.2 mm). It shall weigh 8.1 lbs (3.7 kg).
