PRODUCT INFORMATION BOOKLET

Document Reference: P115-A_PIB_EN_1.2

Distribution Date: October 30th, 2014

General Information

Congratulations on your purchase of the Adamson Systems Engineering Point 115-A subwoofer enclosure. Included in your shipment should be: **1x Point 115-A enclosure**

All products manufactured by Adamson Systems Engineering are inspected before packaging and shipping and should arrive free from technical and visual defects. After opening the shipping container, check for any damage. If found, please notify your Adamson representative immediately. The consignee should then initiate a damage claim with the shipping agent. Be sure to save all contents and packing materials to be inspected by the carrier.

Read this document thoroughly and completely to become familiar with the product. Also read the product manual containing vital information regarding proper use and safety limits of this product. All accompanying documentation can also be obtained by contacting your Adamson representative, or through the website at <http://www.adamsonsystems.com/>.

We are always improving our products and technology, and as such, Adamson Systems Engineering reserves the right to change the contents of its documents without prior notice. Please refer to Adamson Systems Engineering's website for up to date documentation.

Symbols

Important Operating Instructions - Notification of instructions that must be strictly followed to ensure proper use of the product.

Warning - Indication of a potential risk of harm to an individual or possibility of damage to the product.

Safety Instructions

1. Read this document completely.
2. Follow all safety instructions and heed all warnings indicated by the appropriate signal.
3. This product is not to be modified.
4. This product is only to be used in conjunction with equipment or accessories authorized by Adamson Systems Engineering. Using unauthorized items is prohibited as this allows risk of hazardous accidents and/or personal injury.
5. Read the accompanying user manual before using the product. Follow all instructions regarding use of approved accessories.
6. Before suspending this product, read the accompanying user manual's rigging section.
7. Do not expose this product to extreme environmental conditions, such as excessive heat, moisture or rain for prolonged periods of time.
8. Do not store or transport this product on an unstable surface.
9. When transporting this product, please carry by using the handles, or use the approved transportation accessories.
10. Maintain all documentation shipped with the product. Record any service to the product in the maintenance section, and if re-selling the product, include these documents in the transaction.
11. The maintenance section of this document is to be followed exactly.
12. This product is capable of producing extremely high sound pressure levels which can lead to permanent hearing damage to performers, crew and audience members. Do not stay within close proximity of this product when it is in operation and use appropriate ear protection.
13. When ground stacking, this product can vibrate and move. Make sure the product is properly secured when in use in ground stacked configurations.

Proper Use

Please read the Point Series User Manual for proper use of this loudspeaker product.

Rigging

Please read the rigging section of the Point Series User Manual for proper rigging techniques and safety limits. Use Blueprint AV™ to determine proper rigging information.

Point 115-A

The Point 115 Sub has been designed to complement the Point 8 enclosure; its width matching the height of the Point 8 - it can be horizontally mounted under the Point 115 Sub. The Point 115 Sub can also be used as a stand-alone product, paired with your existing system to supplement any missing bottom-end. This Active / Passive cabinet is extremely light weight - 38.5 lbs without crossover, and 43.5 lbs with a crossover. The Point 115 Sub is also available with all SLR™ rigging systems for the Point Series, thus arraying the cabinet is a breeze in any set-up, in any venue.

Specifications

Frequency Range (+/- 3dB)	55Hz - 200Hz
